

My name is Kyle Thomas and I reside on Wagon Trail with my wife Stephanie and our children Rowan, Huxton, Oaklyn and Payson. My wife and I are originally from Indiana and have lived in Colorado for 15 years, the last 3 in Bow Mar. I am a graduate of Purdue University with a degree in Mechanical Engineering and I also have a MS and MBA from Indiana University. I am a proud Bow Mar resident and I believe that our community is made so great not only by the beautiful amenities we steward but also by the neighbors surrounding us. I believe that I have unique professional experience which will be a significant asset to this community. As an investment banker, I have funded over \$2 billion of infrastructure for Cities, Counties and special districts in the state of Colorado. My desire is to offer my professional experience in local government finance as a service to this Town, many of these services we would otherwise pay a consultant to provide. I believe that we need to take a fiscally conservative approach to management and prioritize transparency and engagement between the Trustees and the community. As Trustee, my primary goal is to be a steward of the financial resources we have and only invest in projects deemed most important by the community. I believe in taking a prudent approach to traffic, safety and security which are important issues to this community but cannot be solved without proper engagement of a broad cross section of the community. The Town must improve its level of transparency with residents. Financial information should be easily accessible to the community. Trustee meetings should be made available virtually to drive engagement and participation. For this very election, the Town is asking voters to approve a bond for a project which we know nothing about. Before approving a debt obligation or the perpetual extension of the road tax, a robust community engagement process should be undertaken to ensure that we are solving the problems most important to this community without burdening the residents of the Town with unnecessary debts or tax bills. I look forward to serving the Town and continuing the legacy of this unique community and most importantly fostering a sense of transparency, engagement and trust.
