

Cici and I have been residents of Bow Mar since 1988. When Cici was 8+ months pregnant with Ashley during that long, hot summer of '88, a close friend who grew up in Bow Mar introduced us to the neighborhood. We fell in love with all Bow Mar offers. We have raised our three children (Ashley, Claire, and Ian) here. Over these 36 years, I have been fortunate to serve on the BMOI Board on two (2) different occasions. I enjoy being able to give back and show my dedication to making our town a great place to live.

When I was asked to fill the vacant spot on the Trustees Board in 2023 as the Public Works Commissioner, the Mayor and existing Trustees requested I focus my time and energies on their goal of "Safety". My time was spent on (1) replacing the outdated and damaged traffic signs throughout the neighborhood, (2) removing and replacing Juniper St which was scheduled in the existing roads program, and (3) work with outside resources to provide a long range plan to finish the existing roads program, to improve the quality of our major arterial roads and to create a maintenance program to preserve the investment in our roads for the upcoming 20 years.

After graduating from engineering school at the University of Nebraska, I moved to Denver in 1983 to pursue my MBA from the University of Denver ('85). I met Cici who was also in the MBA program. Since graduation, I have worked for various companies in the construction, healthcare, and security businesses. My most recent position was President of Sierra Companies where we provided high tech and physical security solutions for mission critical facilities and individuals around the world. After leaving Sierra, I started my own consulting organization to provide similar solutions to military installations and supporting agencies. I have recently retired and have the time and energy to assist the Town Trustees to my fullest capabilities.

My present and past experiences running/managing various companies and being active on numerous Boards around the Denver metro community provide me with a unique perspective on how to support the Trustees with their responsibilities to the residents of Bow Mar, as well as how our town relates to other municipalities in the Denver metro area.

A brief list of the non-profit organizations I have worked with include:

Present:

Florence Crittenton Services (wraparound services to pregnant and parenting teens at FC High School in DPS)

Horizons of Colorado

Past:

BMOI (twice)

Denver Metro Goodwill Industries

Parkinson Association of the Rockies

Seniors Inc.

Streets Hope

Arapahoe Tennis Club

And, I have volunteered at our church and as a coach for various sports, as well as supported Cici when she was a part of starting youth girls' lacrosse in Colorado.
